Information For And About Saginaw/Delphi Employees

## Diamond Size Machine Best Technology Available

The Diamond Size machine from Accu-Cut will size the valve body inside diameter within 15 – 20 millionths of an inch (0.000015” – 0.000020”) and provide cylindricity within 45 millionths of an inch (0.000045”). This machine will provide the straightest, roundest bore, closest to a cylinder shape. This is the **BEST TECHNOLOGY** available in today’s marketplace.

This machining operation will allow us to provide a part within one class (0.0001) thereby eliminating the need to classify valve bodies within 20 classes (0.002).

Look for 3 more Diamond Size machines before year’s end.
